Project Design Phase-II Solution Requirements (Functional & Non-functional)

| Date | 21 October 2022 |
|---------------|--|
| Team ID | PNT2022TMID03587 |
| Project Name | Project - Intelligent Vehicle Damage Assessment and Cost Estimator for Insurance Companies |
| Maximum Marks | 4 Marks |

Functional Requirements:

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task) |
|--------|-------------------------------|---|
| FR-1 | User Registration | Registration through Form Registration through Gmail Registration through LinkedIN |
| FR-2 | User Confirmation | Confirmation via Email Confirmation via OTP |
| FR-3 | User Interface | User friendly and simple website |
| FR-4 | Collection of datasets | Information about the user and their vehicle. Information about Insurance plans. |
| FR-5 | Results | Model should be trained with high accuracy. Results obtained from the model should be displayed to the user with easy interpretability. |

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description |
|--------|----------------------------|--|
| NFR-1 | Usability | Intelligent model to assess the damage in the vehicle and estimate the cost to be provided by the insurance company. |
| NFR-2 | Security | The authenticity of the user and the confidentiality of the user details about their vehicle should be maintained. |
| NFR-3 | Reliability | This project should be able to achieve good accuracy in damaging assessment as well in cost estimation so that the user is provided with the accurate and unbiased insurance amount. |
| NFR-4 | Performance | The real time images should be captured and uploaded into the website where the proposed model will carry out the damage assessment and give the cost of insurance accordingly. |
| NFR-5 | Availability | The webpage should be compatible for the web browsers in both mobile phones and computers. |
| NFR-6 | Scalability | The proposed solution will be scalable in future because of the efficient and quicker analysis and exact cost prediction |
